DON'T BE CAUGHT OFF-GUARD!

Sure-Lock offers peace of mind, morning, noon and night.

What is Sure-Lock?

Sure Lock is a Floor/Door lock that uses the floor as its anchoring point (not the door-jam). Sure-Lock allows you to safely open the door 1½" to view visitors while still in the locked position

With the door in the open or closed position Sure-Lock can withstand over 5000 Pounds of Direct Impact Force

The Sure-Lock Homes Defense System

is constructed using the highest quality stainless steel and is available in two attractive finishes: Solid Brass or Brushed Steel.

The unlocked position

Setting 1

The steel bolt drops directly into the floor NOT allowing the door to open.

Setting 2

The steel bolt drops directly into the second floor plug allowing the door to open 1½".

Setting 2

with the door open 1½" you can now view visitors with confidence and safety.

Sure-Lock can be installed on any door and on any floor surface. Once installed, it requires no maintenance and is ready to use.

Police are doing the best possible job they can, but they simply cannot prevent a forced entry or home invasion. **It's up to you** to educate and equip yourself with the best security products available.

"Sure-Lock is the strongest, safest and most reliable door lock on the market."

The Sure-Lock Flush Bolt.

This product uses the floor as an anchoring point the same way as the standard Sure-Lock. Only a single bar drops from the door directly into a floor plug. This lock can be used for inward and outward swinging doors and can stand alone or work in conjunction with Sure-Lock. It is ideal for double entry doors, back, side, or basement doors. It can also be used on French doors, motor homes and commercial exit doors.
